SUMMARY

Full Stack Developer with 3+ years of experience building responsive web applications using React, Node.js, MongoDB, JavaScript, and TypeScript. Experienced in developing full-stack solutions, integrating third-party APIs, implementing authentication systems, and deploying applications to cloud platforms. Passionate about backend engineering, networking, cybersecurity, and creating scalable software solutions.

TECHNICAL SKILLS

Frontend:

- React, TypeScript, JavaScript, HTML5, CSS3

Backend:

- Node.js, Express.js, Python, PHP, Socket.IO, Flask

Databases:

- MongoDB, MySQL

Other Technologies:

- JWT Authentication, Cloudinary, OpenAI API, Canvas API, Git & GitHub, Socket Programming, MultiThreading

PROJECTS

Python Vulnerability Scanner

Technologies: Python, Flask, Sockets, Multithreading, HTML/CSS

- Developed a vulnerability scanner capable of scanning network ports and identifying common services.
- Implemented multithreaded port scanning to improve performance and responsiveness.
- Built an intuitive dashboard for displaying scan results and potential security findings.
- Deployed application for public access and testing.

Messaging Application

Technologies: React, Node.js, Socket.IO, Cloudinary, Express

- Built a real-time messaging platform supporting instant communication between users.
- Implemented image sharing using Cloudinary integration.
- Developed responsive user interfaces and real-time event handling with Socket.IO.

AI Chat Application

Technologies: React, TypeScript, MongoDB, JWT, OpenAI API

- Developed an AI-powered chat platform supporting text and image interactions.
- Implemented secure authentication and user session management.
- Integrated OpenAI APIs to generate intelligent responses.

Book Store Management System

Technologies: React, Node.js, Express, MongoDB

- Built a full-stack CRUD application for managing book records.
- Implemented create, update, delete, and search functionality.
- Designed responsive interfaces with multiple viewing options.

Online Marketplace

Technologies: React, Node.js, Express, MongoDB

- Developed a marketplace platform allowing users to manage product listings.
- Implemented image uploads, product management, and responsive layouts.

Movie Discovery Application

Technologies: React, JavaScript, TMDB API

- Integrated TMDB API to fetch trending and searchable movie data.
- Implemented favorites functionality and dynamic search features.

ADDITIONAL PROJECTS

- Snake Game (Canvas API)
- Memory Game (Canvas API)
- Ping Pong Game (Canvas API)

EDUCATION

Bachelor of Science (B.Sc.) – Computer Science

University of Nigeria, Nsukka

Expected Graduation: 2027

INTERESTS

Software Engineering • Networking • Cybersecurity • Chess
